

Real Estate Decision & Execution Infrastructure.

The deterministic API layer that turns chaotic portal traffic into structured, fraud-checked deal rooms.

The Paradigm Shift

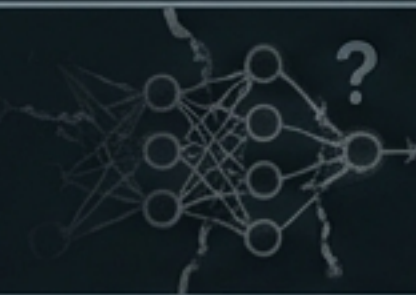

Legacy Portals (The Problem)

Selling Attention (Ads)

Static / Historical Data

Generative /
High Hallucination

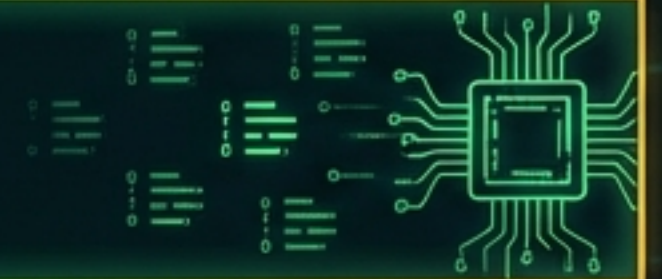

Unstructured
WhatsApp Chaos

Entrestate OS (The Infrastructure)

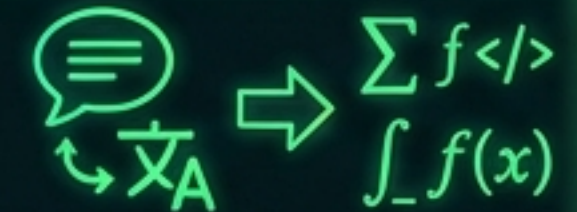

Selling Workflow
(Infrastructure)

Predictive Demand /
Capital Flow Engine

Translation Layer
(Intent to Math)

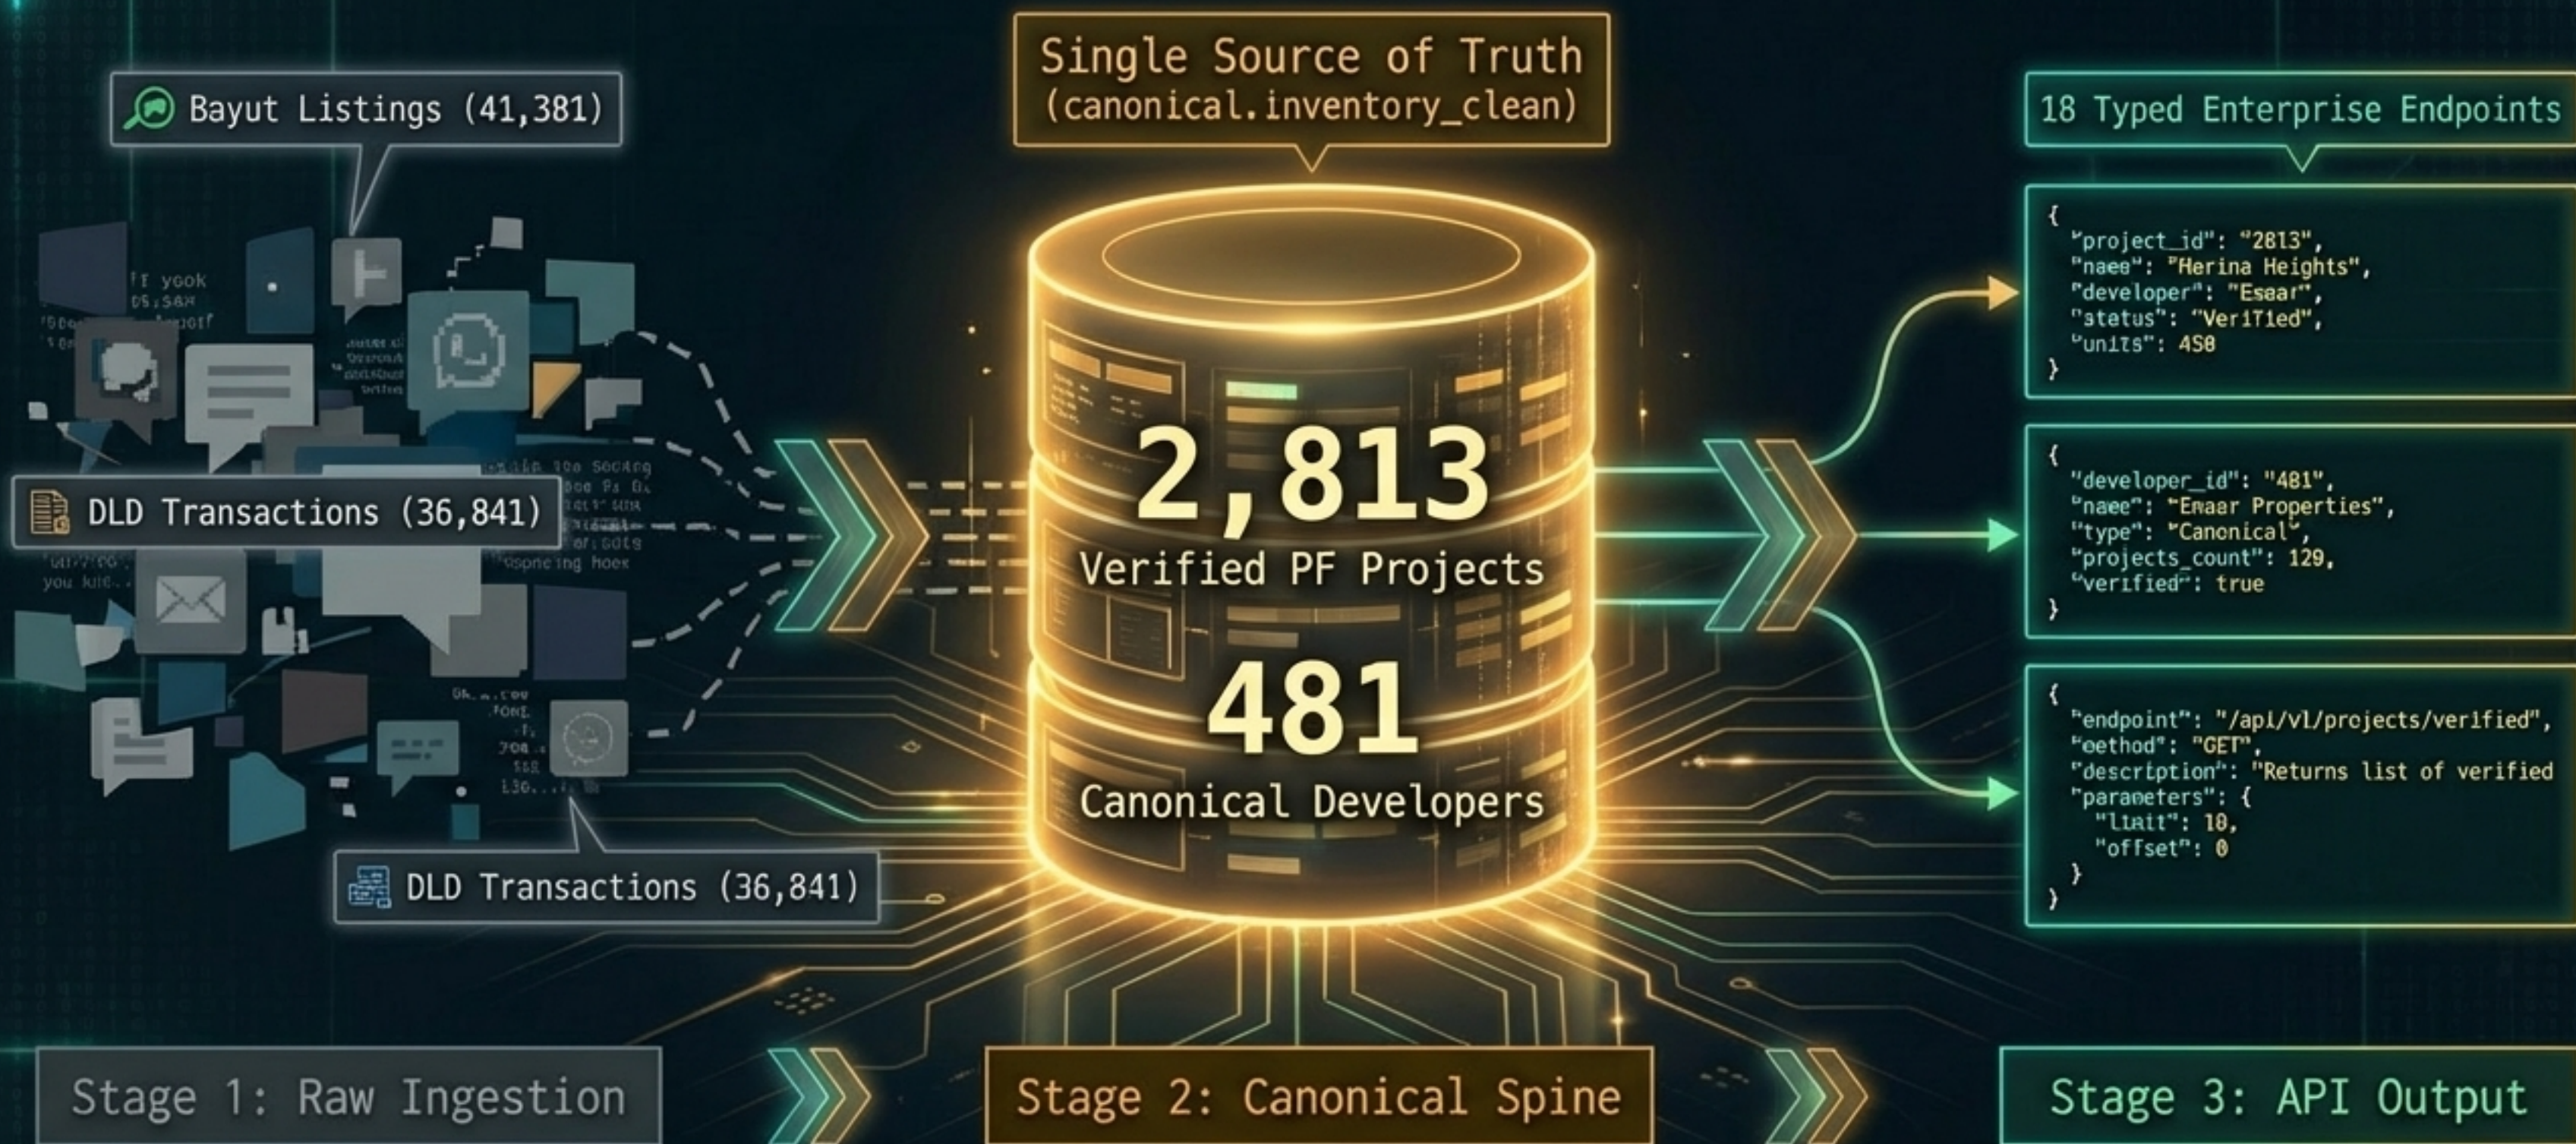

Structured Deal
Rooms (SDRs) &
State Machines

Unified Architecture: The Brain & The Hands

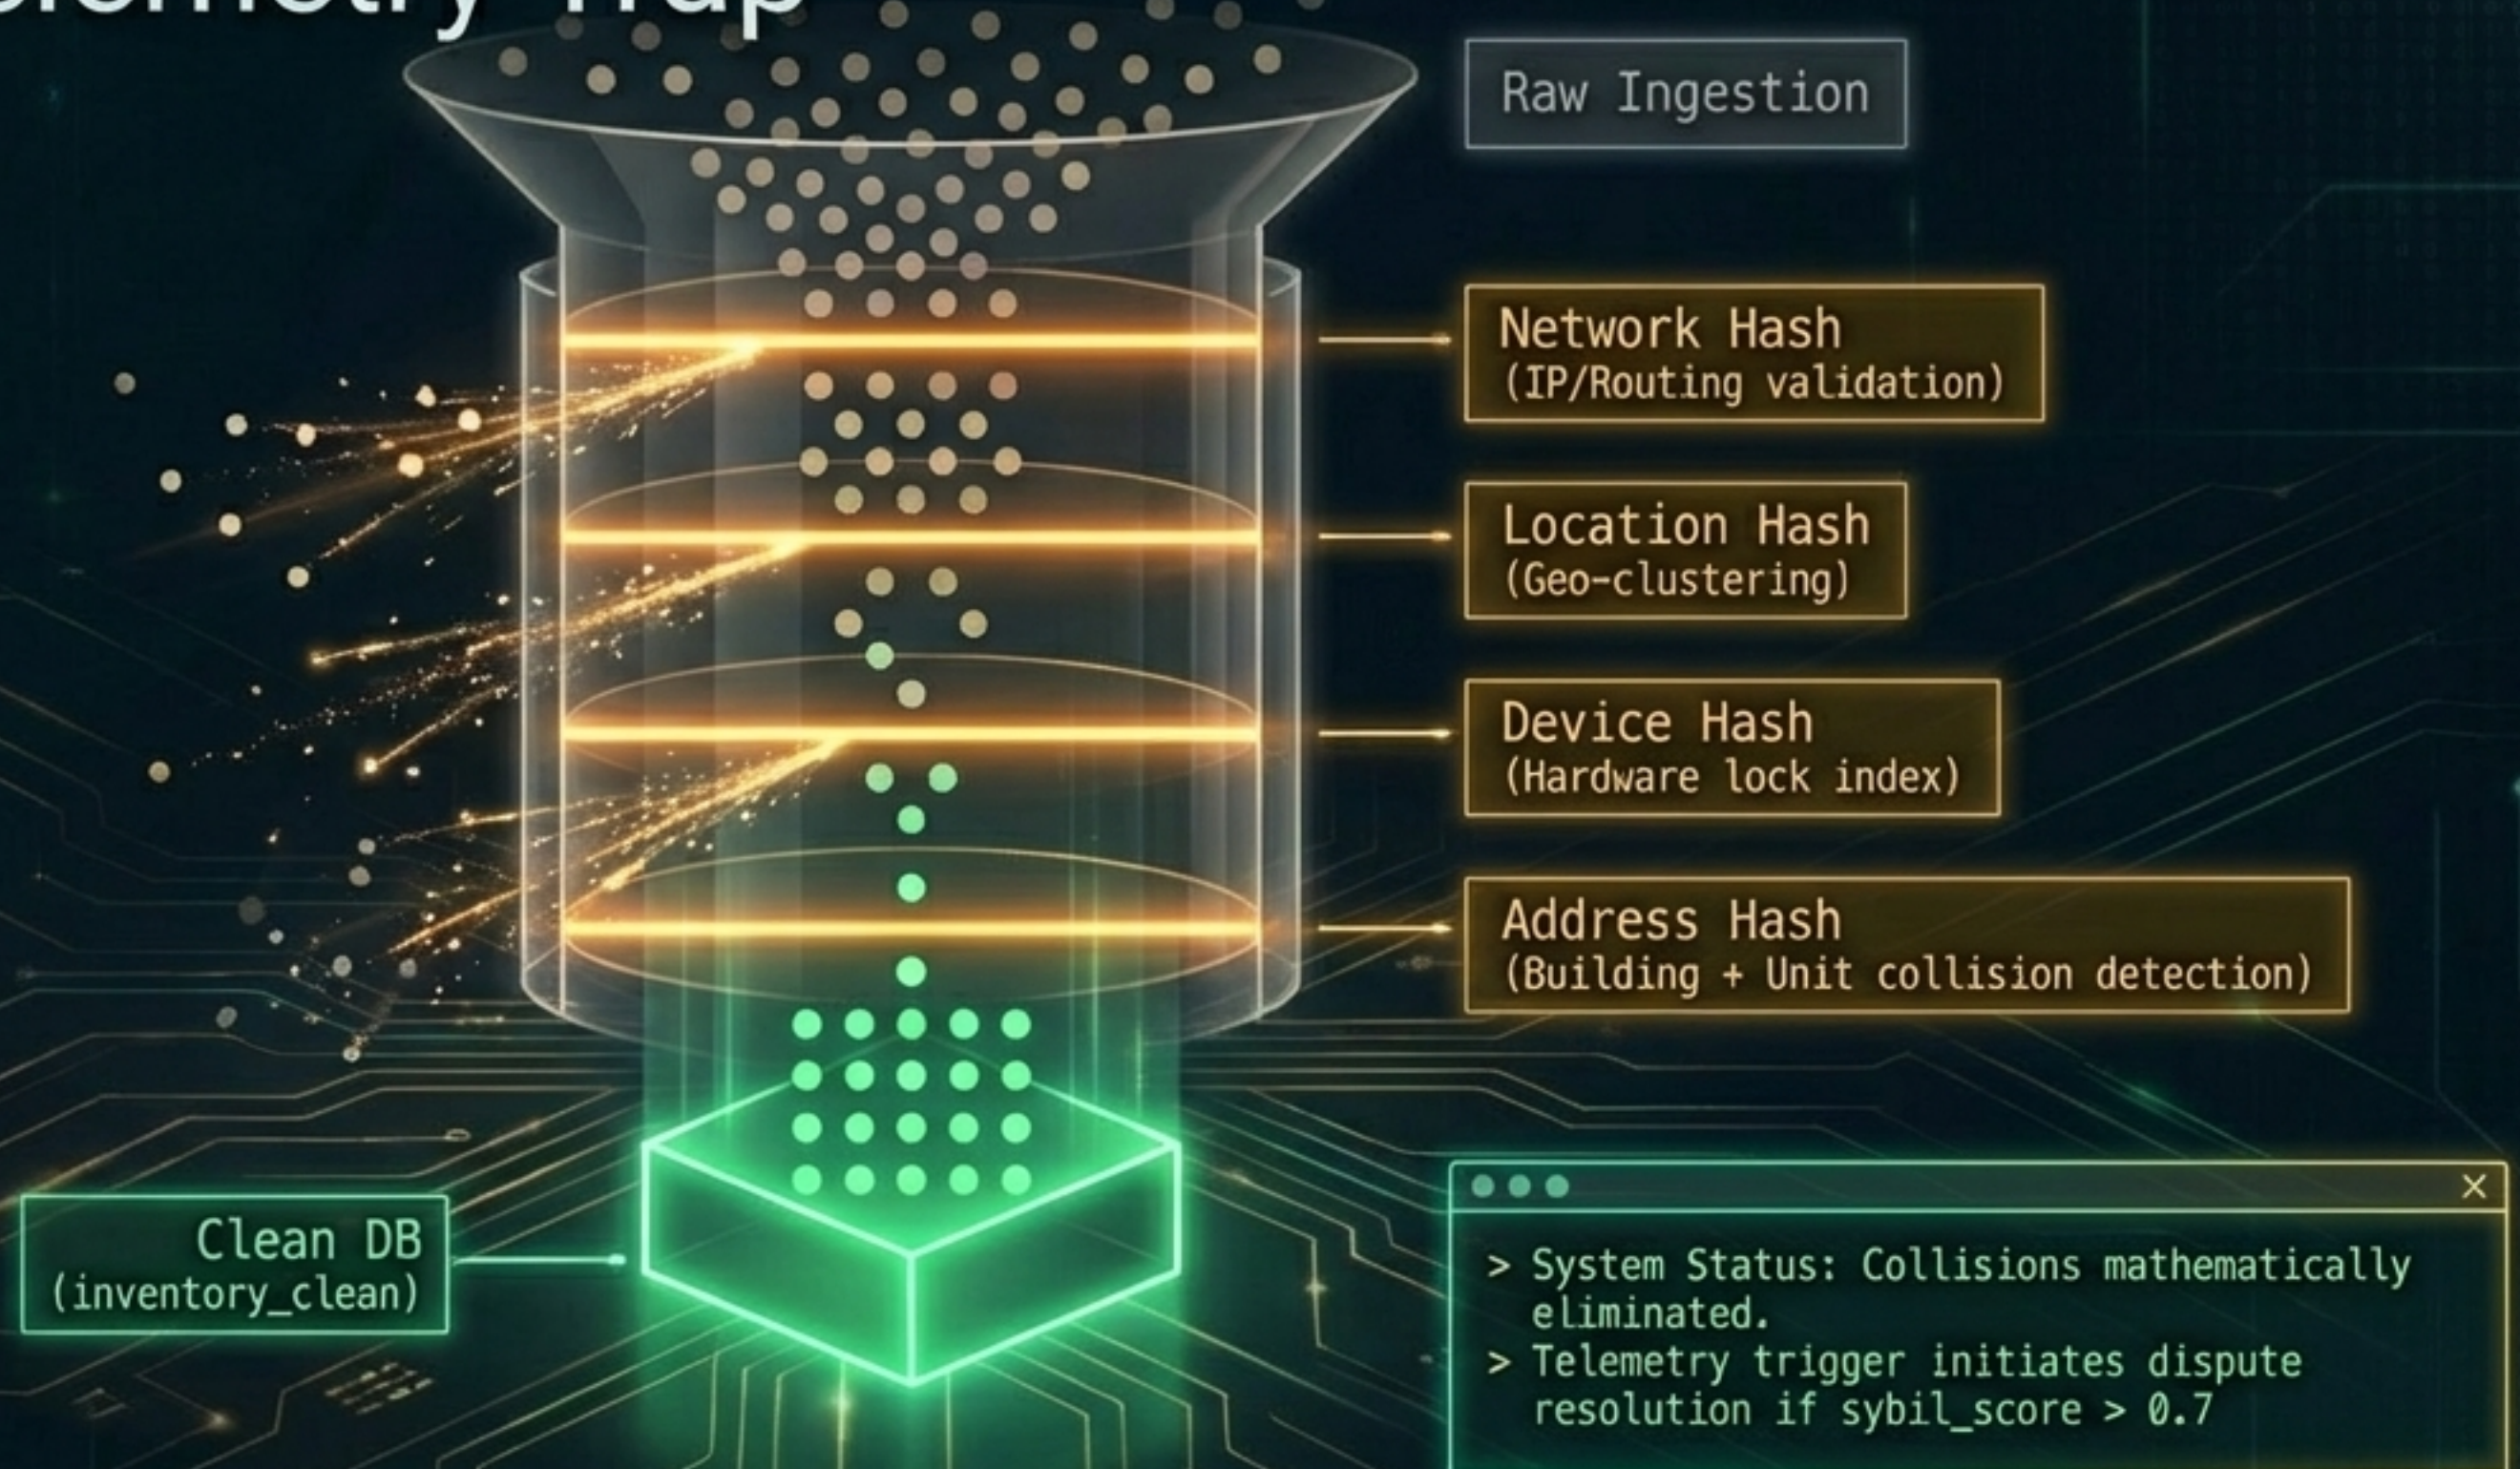

The Institutional Data Moat

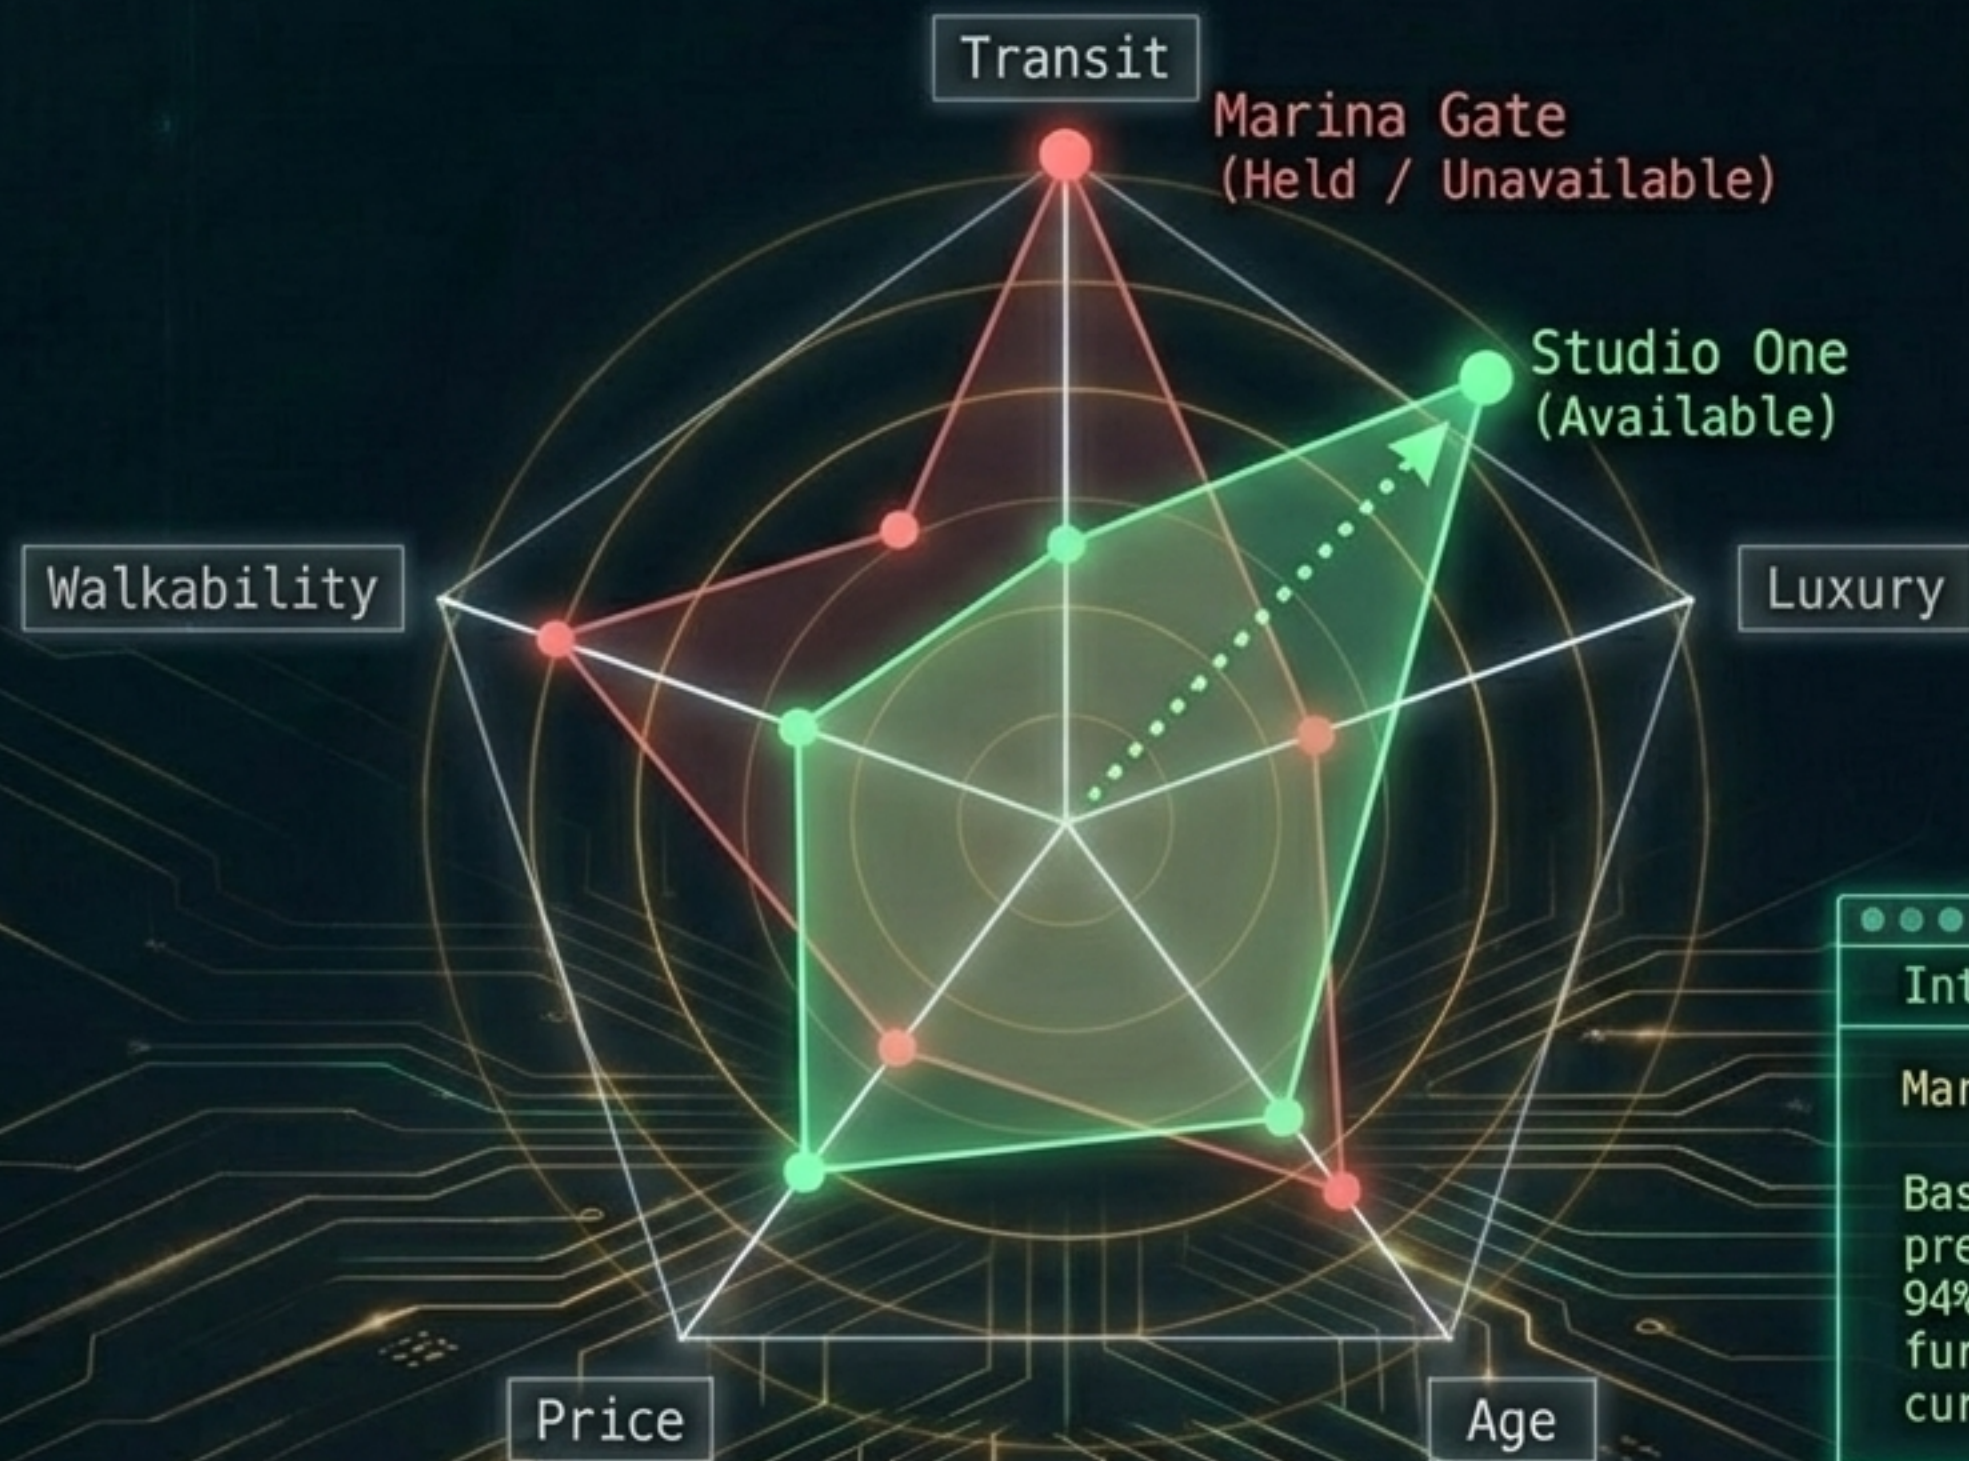

Deep Dive: Decision Infrastructure

The Sybil Telemetry Trap

The Mapped City (pgvector Genome Engine)

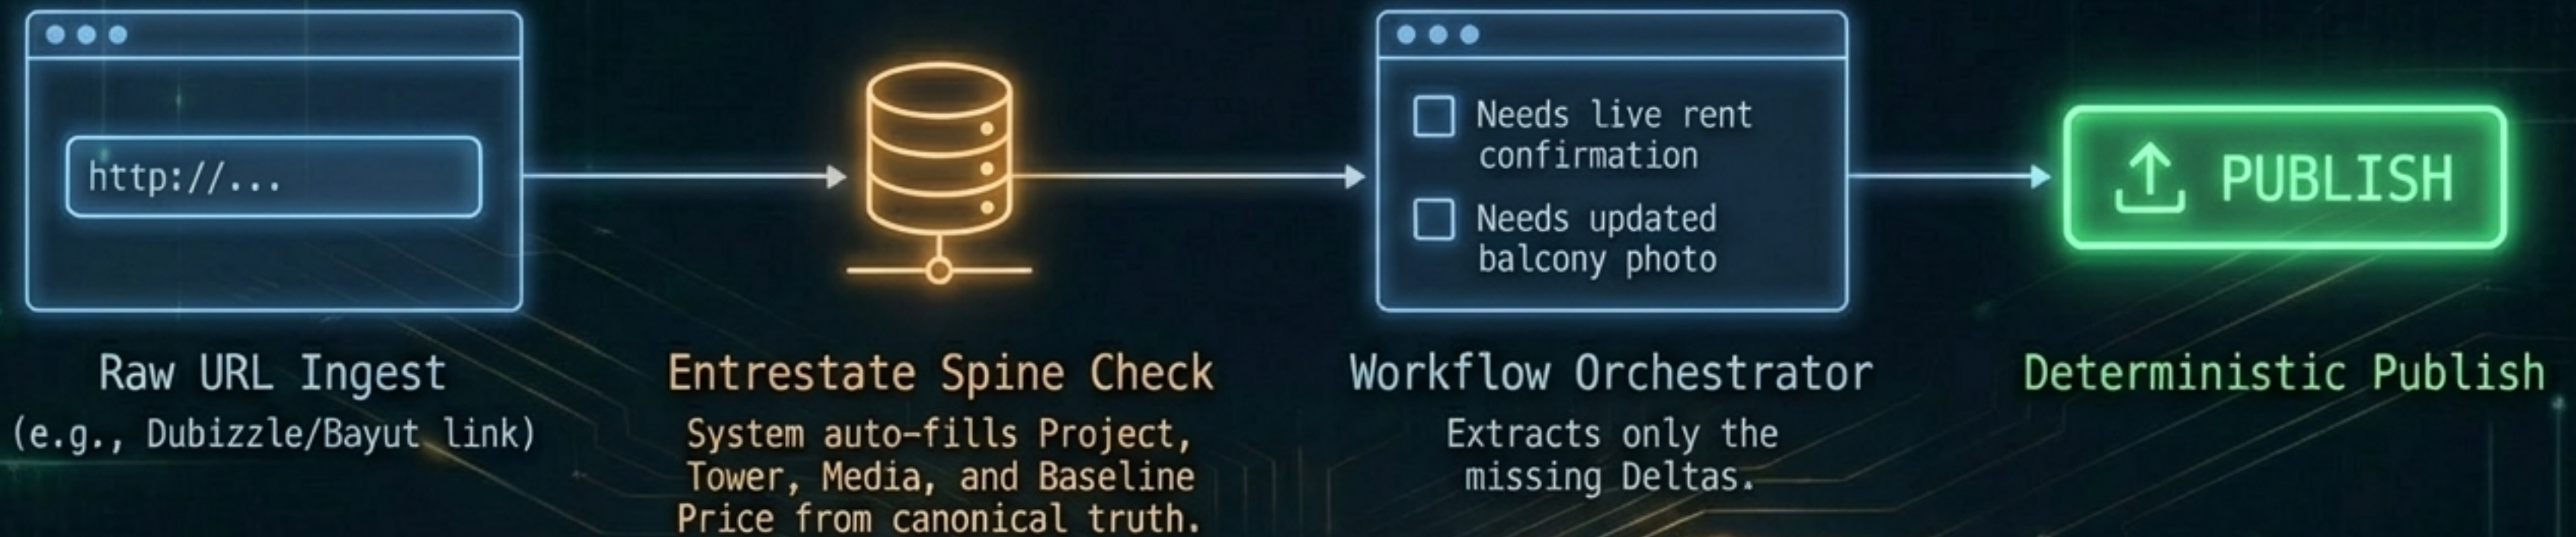

Intelligent Soft-Bounce

Marina Gate is currently held.

Based on your vector preferences, Studio One is a 94% genetic match, 2 minutes further from the metro, and currently available.

Deep Dive: Execution Infrastructure

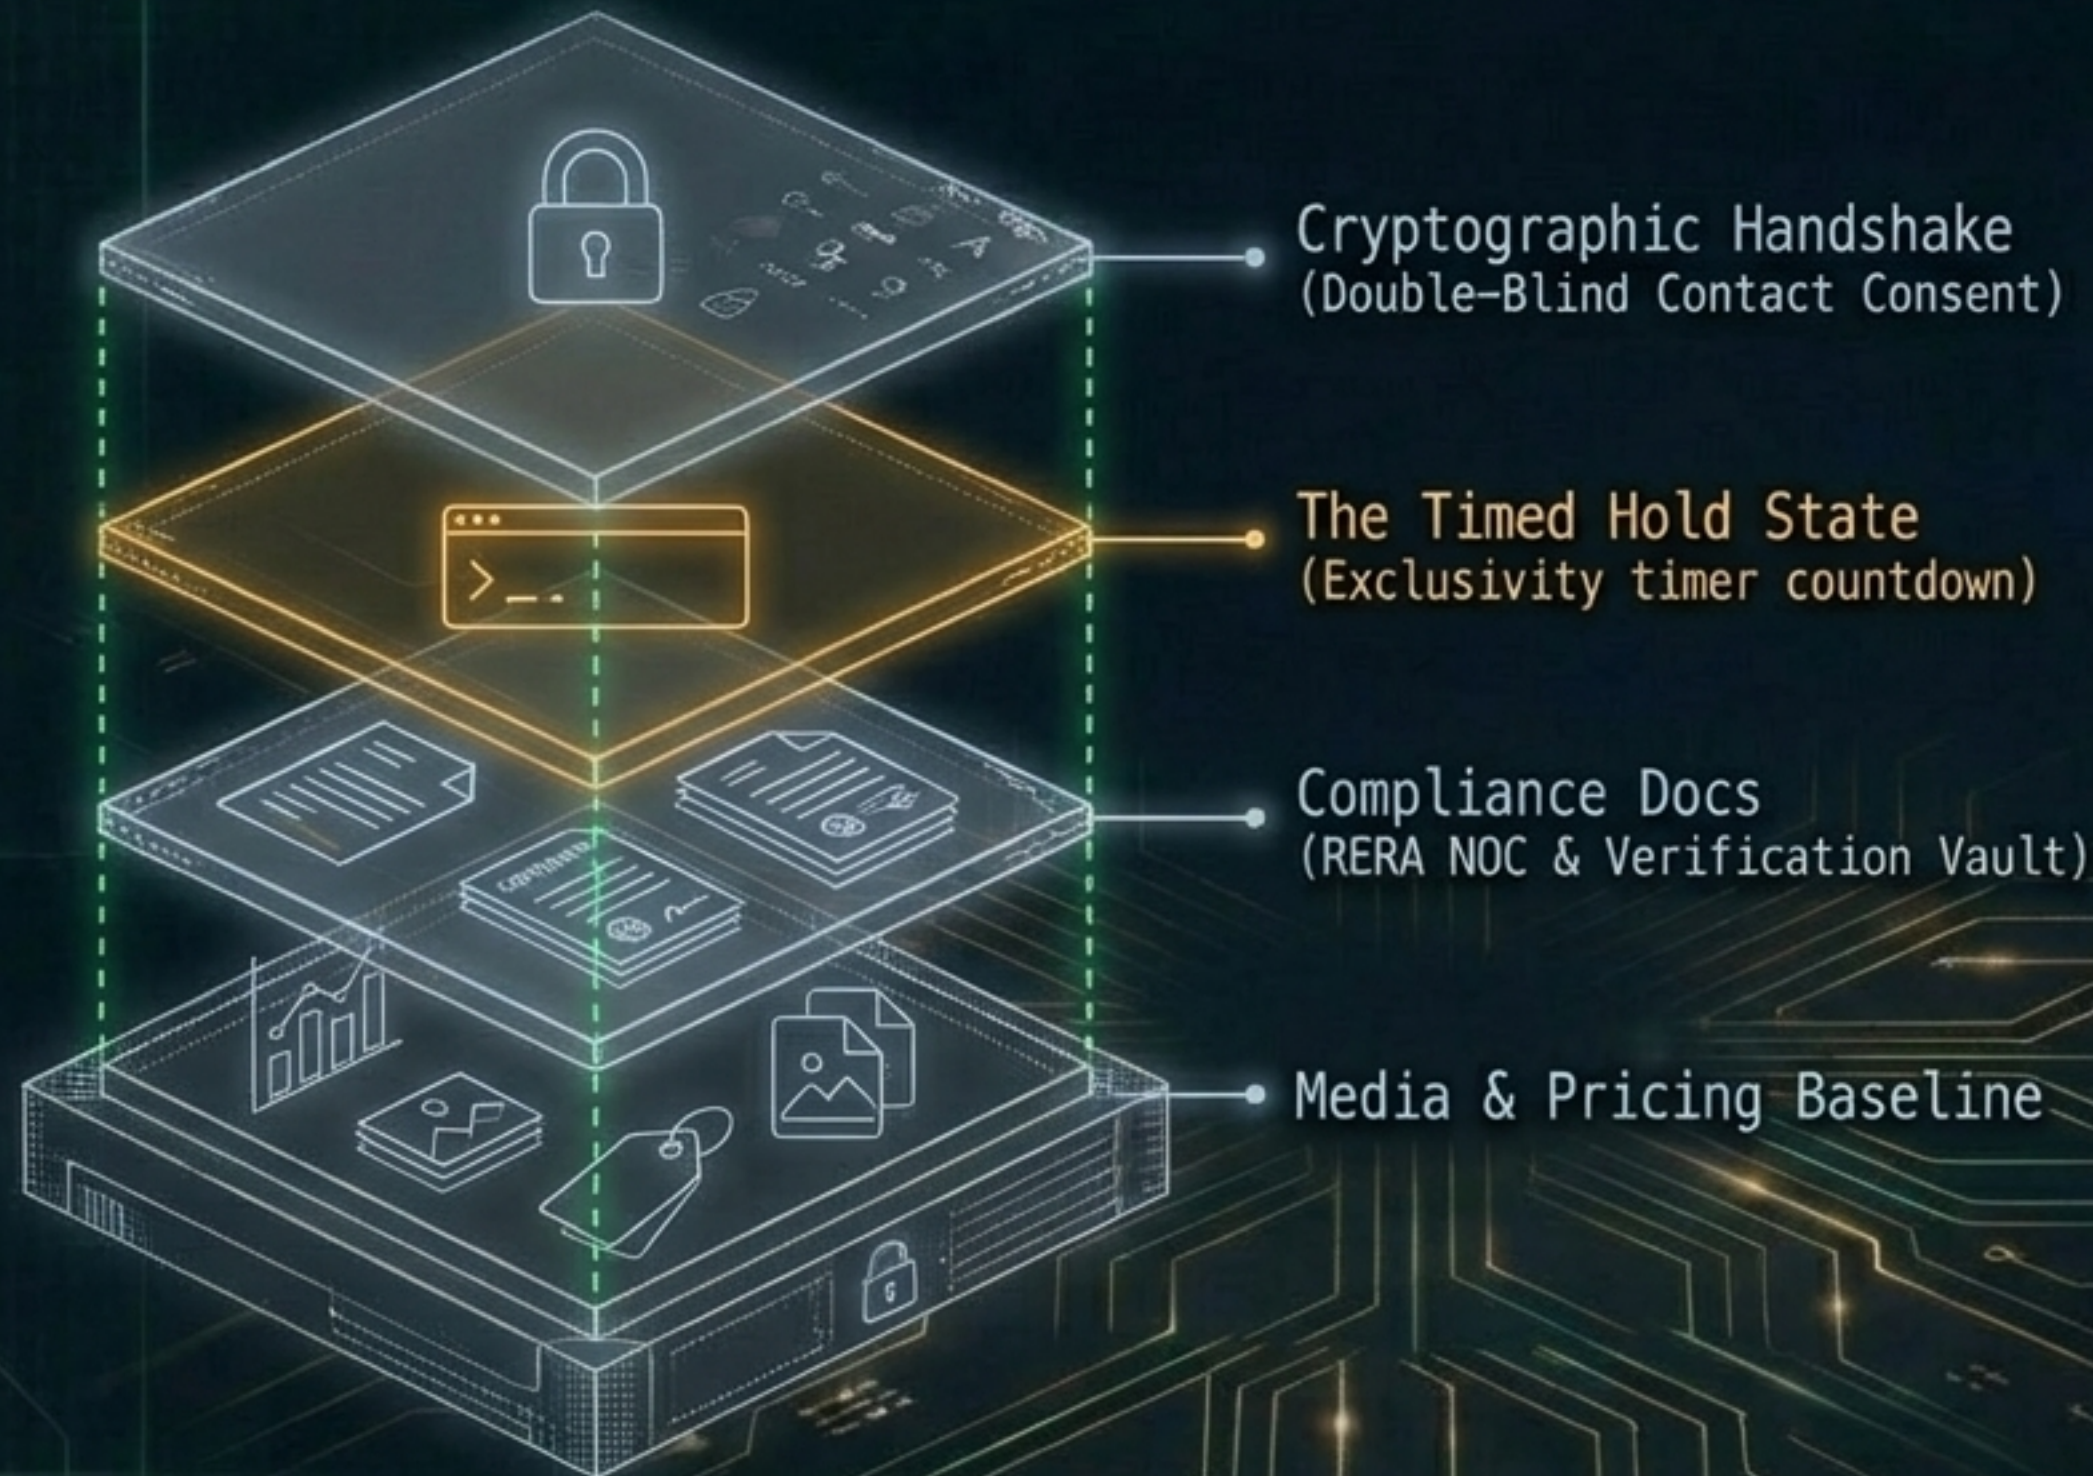

Delta-First Onboarding (Killing Data Entry)

We don't ask landlords to rebuild what the database already knows.

The Structured Deal Room (SDR)

The Transactional Primitive replacing chaotic WhatsApp negotiations.

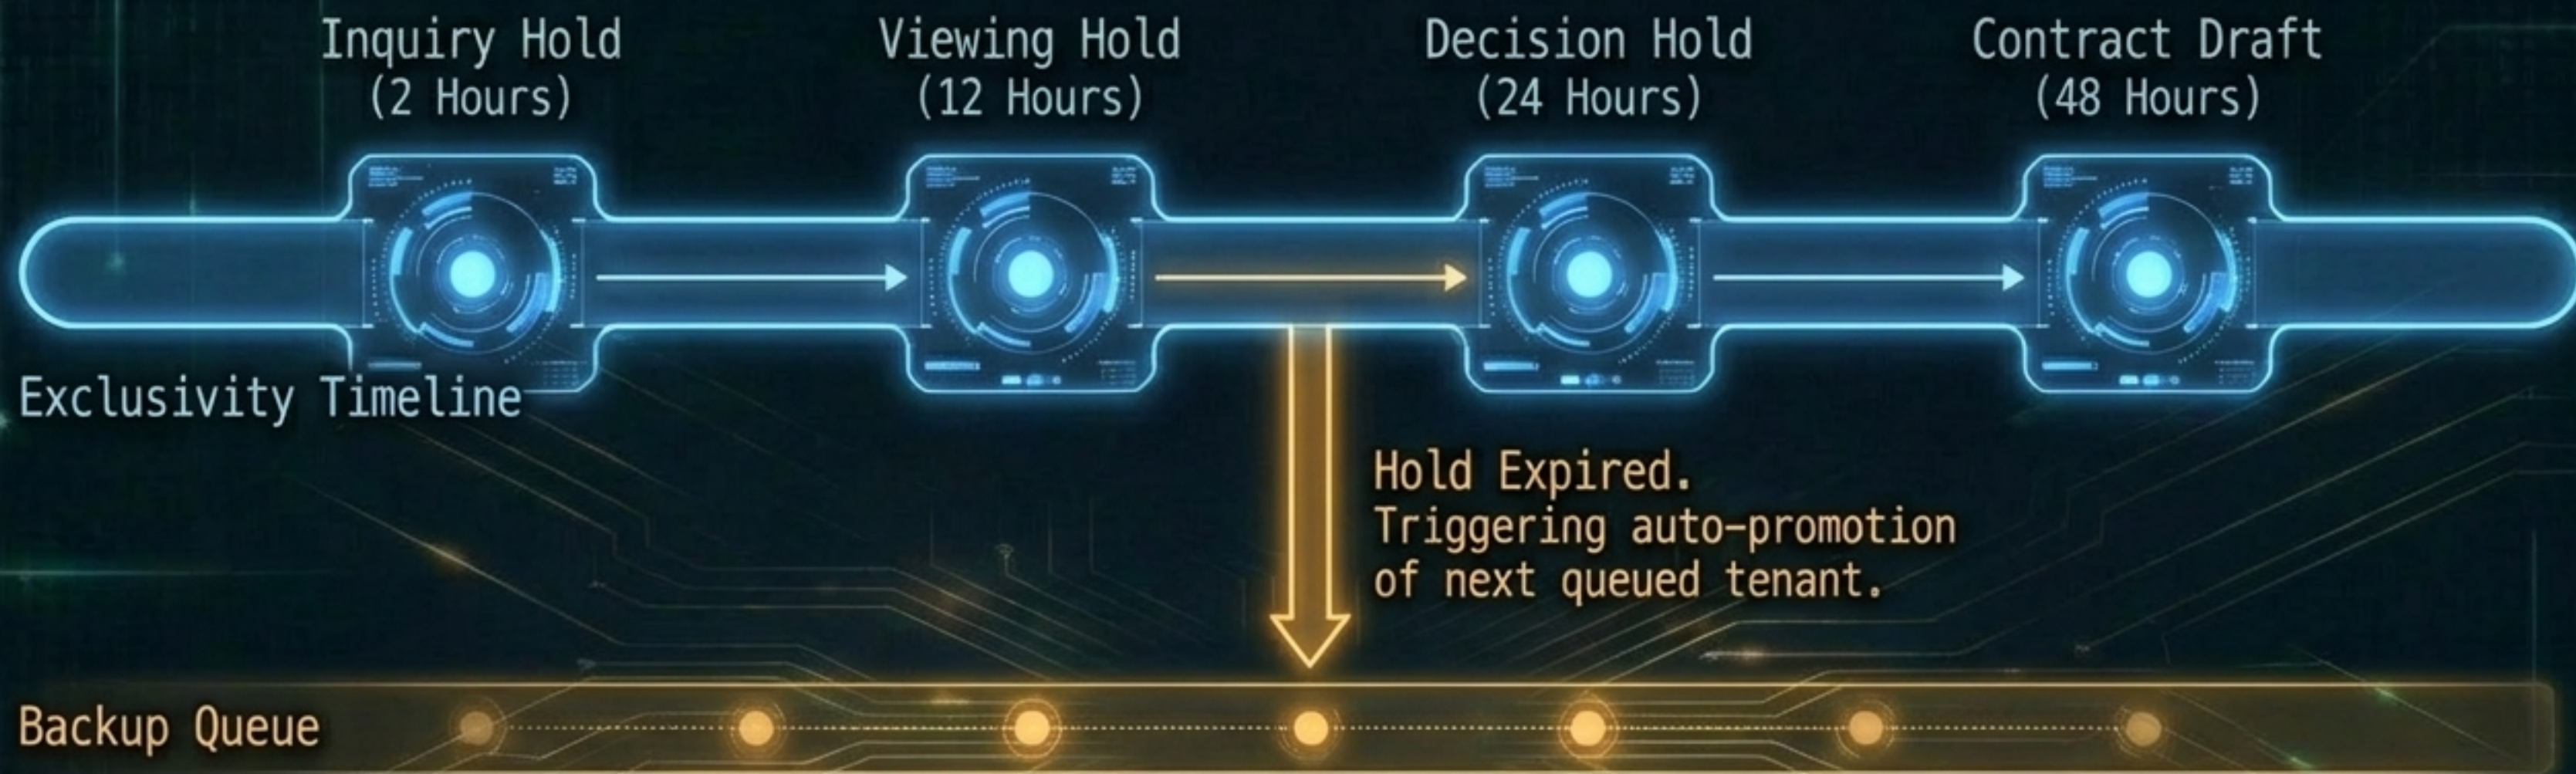

State Machine Enforcements

- 44 Database Tables
- 11 PL/pgSQL Functions
- 25 Enforced State Transitions
- Zero UI Opinions

The Liquidity Engine

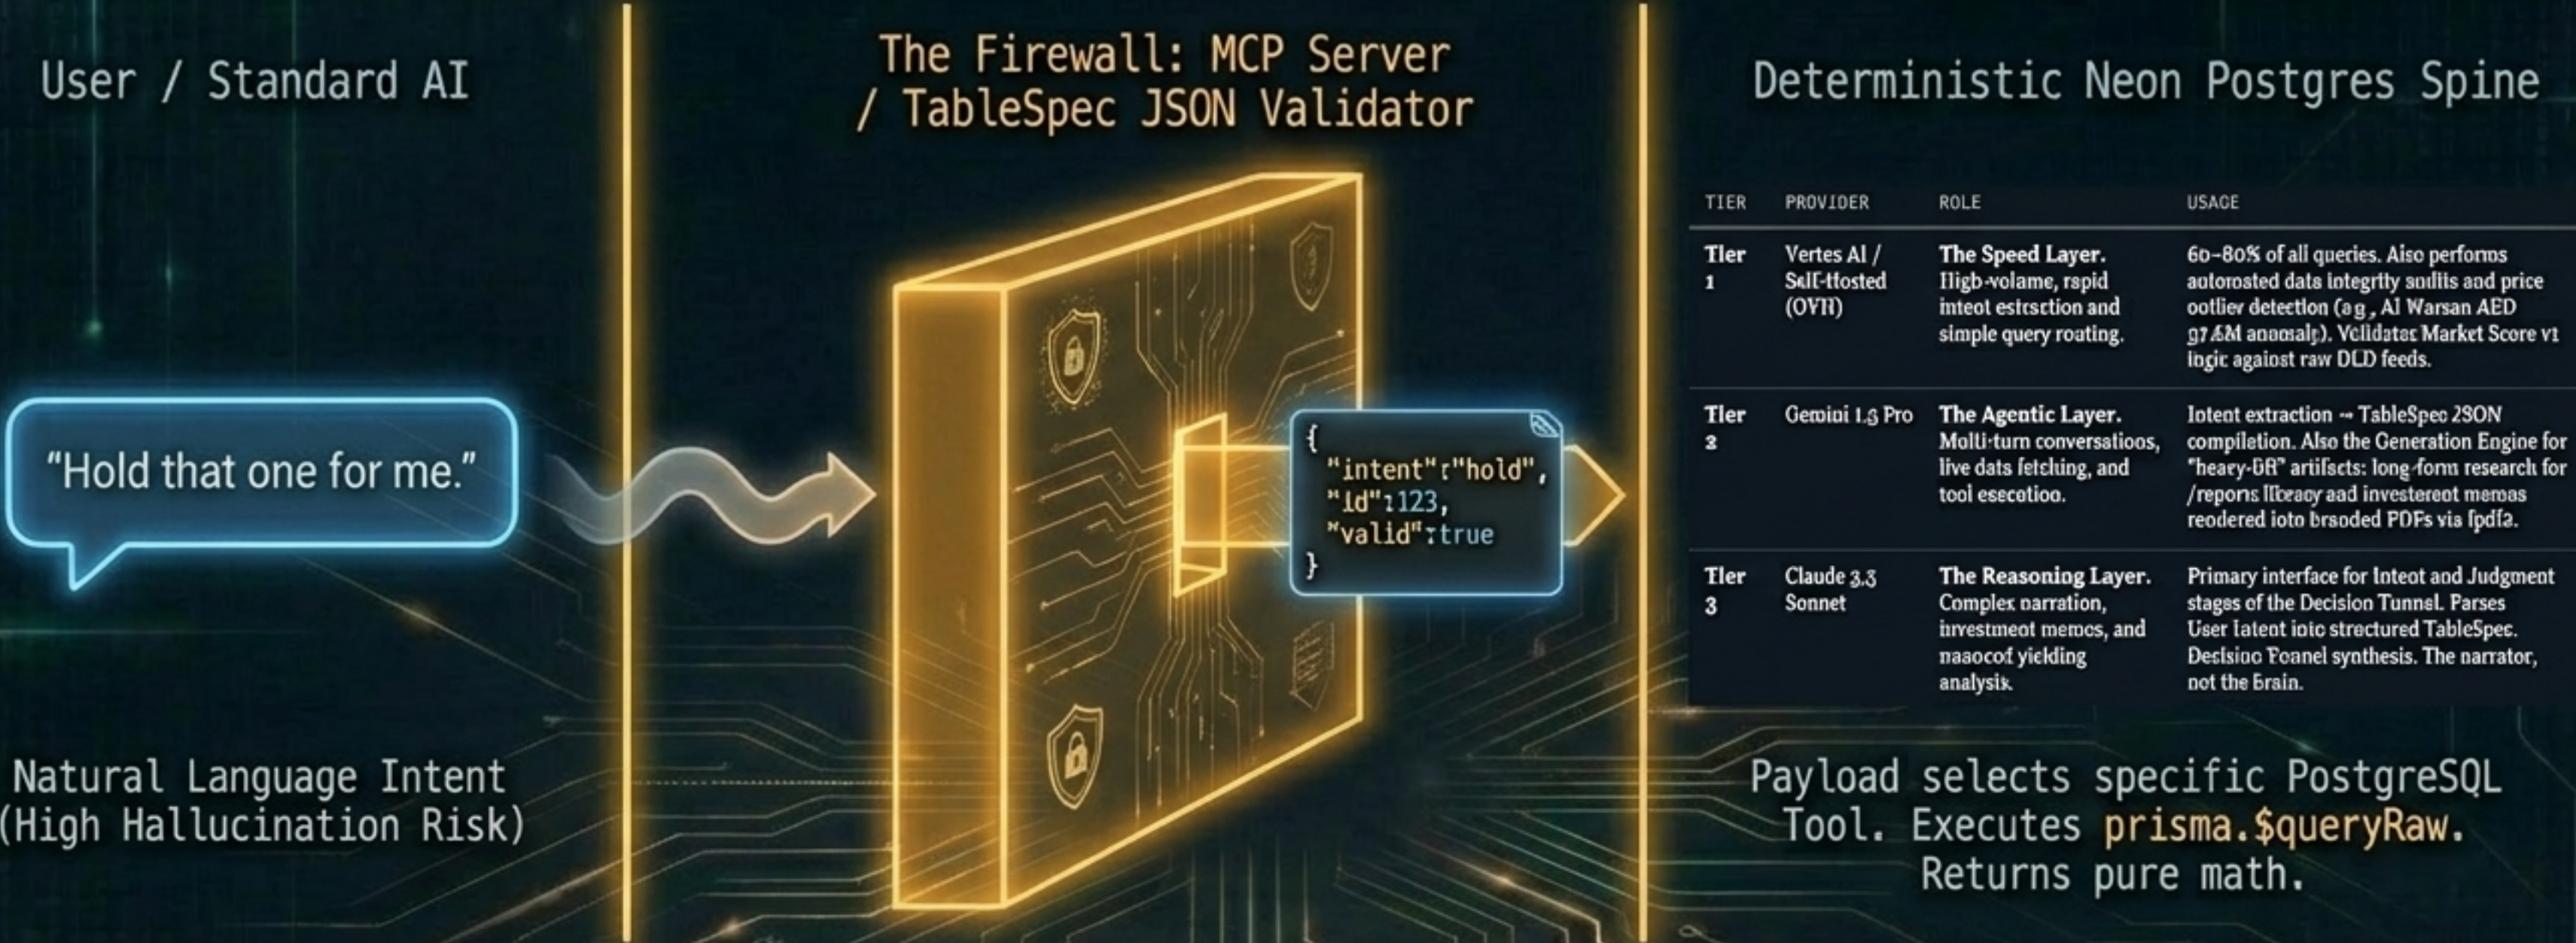

Algorithmic yield management protecting landlord ROI.

**Protects tenant focus. Protects landlord liquidity.
Enforced via Postgres row-level locks.**

The Intelligence Bridge

The Agentic Firewall (Zero Hallucination)

AI is a routing layer, never a database query tool.

Enterprise Integration

The Headless, B2B Architecture Payload.

The Brain: [GET] /api/intel/

```
1 /decision/screen
2 // (Ranked projects via TableSpec JSON)
3
4 /decision/project/:id
5 // (Full intelligence package)
6
7 /decision/compare
8 // (Delta analysis matrix)
9 █
```

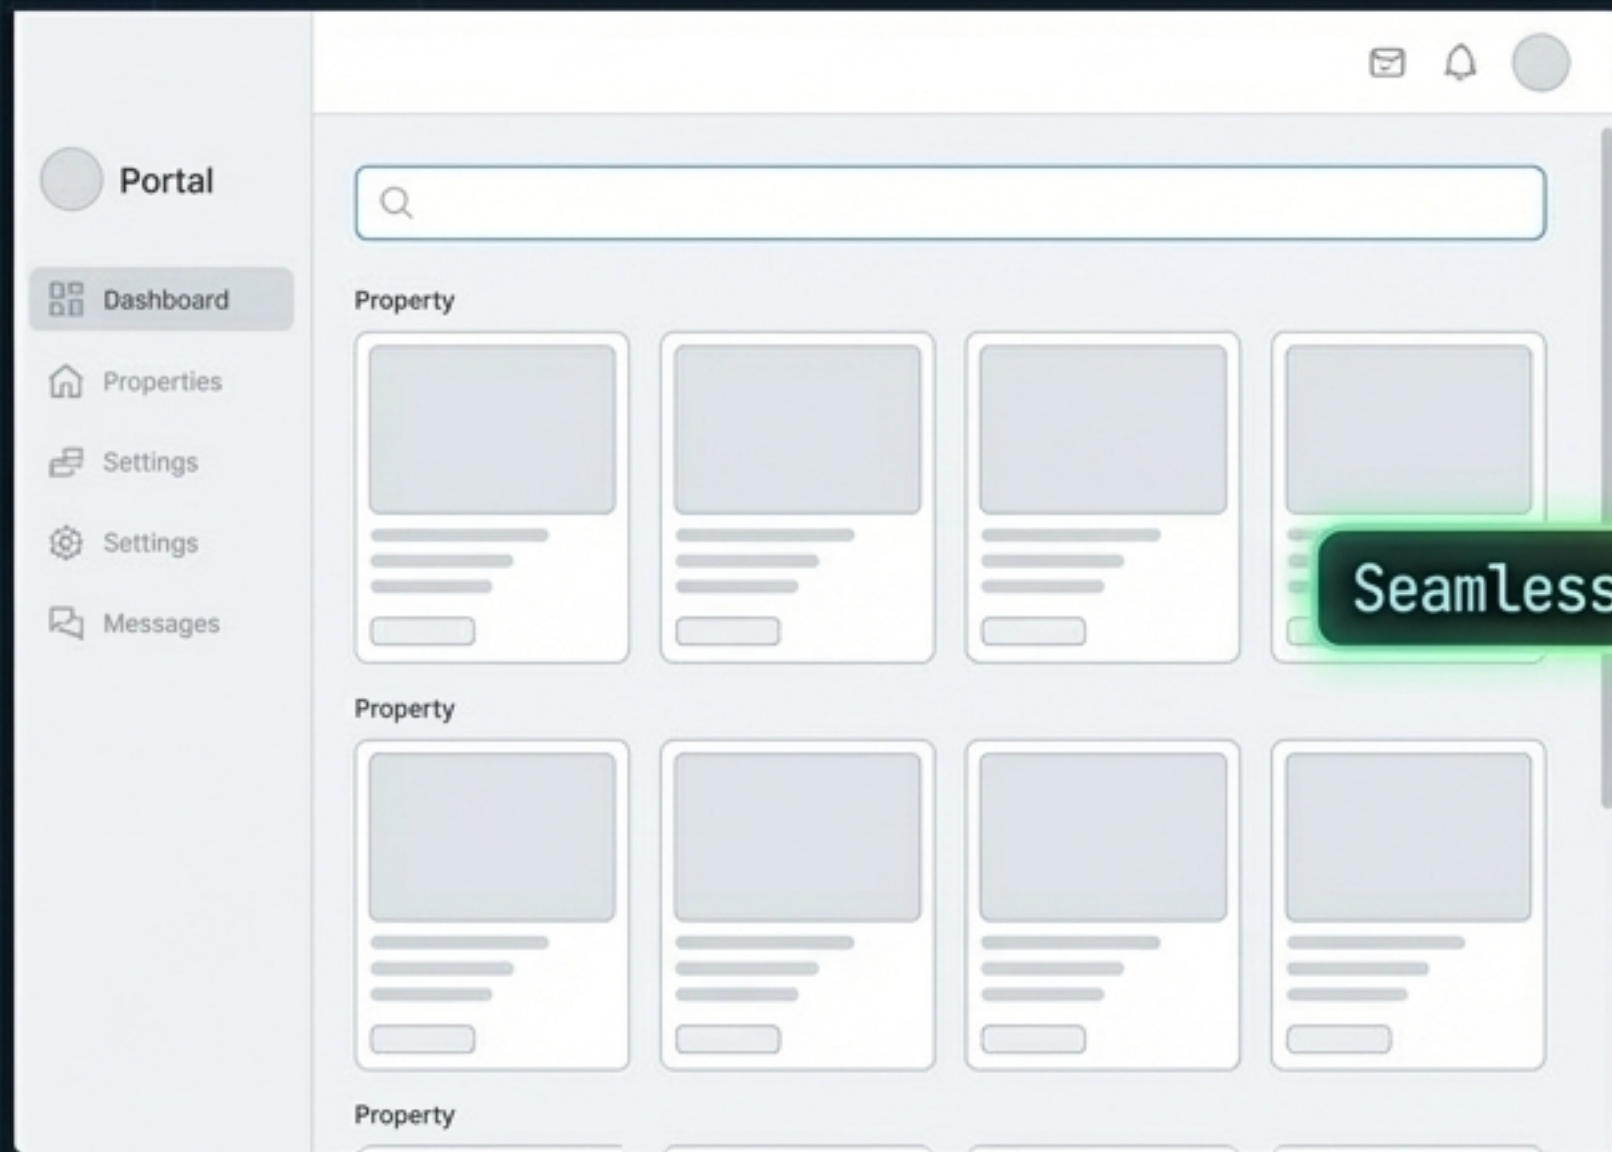

The Hands: [POST] /api/tx/

```
1 /deal-chats/:id/contact-share
2 // (Mutual cryptographic reveal)
3
4 /folders/:id/join-queue
5 // (Algorithmic liquidity queuing)
6
7 /deals/:id/draft-agreement
8 // (Deterministic contract generation)
9 █
```

18 Typed Enterprise Endpoints. Zero UI Opinions.

The Deployment Model

Your Frontend (Client Ownership)

Our Brain (Entrestate Ownership)

Seamless API Payload

You don't change your frontend. You plug in our backend.

Phase 2 Enterprise Roadmap

Scale, Security, and Compliance.

Q2 2026

Peer-Gating Middleware:
Rate limiting and API key management per licensee.

Search Index Optimization:
Sub-10ms queries on full inventory.

Q3 2026

SOC 2 Type II Certification:
Enterprise-grade security audit.

Multi-Tenant Isolation:
Schema-level data separation per licensee.

Entrestate is a unified real estate decision and execution infrastructure layer built on one truth system, proper API boundaries, and deterministic workflow control.

Deploy the Infrastructure. Own the Transaction.
